EDUCATION

2019- M.A. in Economics, China Foreign Affair University
2015-2019 B.A. in Economics, Central University of Finance and Economics (minor in Accounting)

RESEARCH INTERESTS

Primary: Labor Economics
Secondary: Public Economics, Development Economics

WORKING PAPERS

2019 “Tax Burden and Firm investment: Evidence from Value-added Tax Reform in Service Industry” (outstanding undergraduate thesis)
2018 “Fertility and Old-age Support: Quantity Effect and Gender Effect in Urban and Rural China”
2018 “The Timing of Heating and Air Pollution” (with Xian Zhang, Di Wu)

WORKS IN PROGRESS

2019 “When Classes are Classified: Cluster Effect on Academic Achievement”
Motivation: It is commonly seen in chinese middle and high schools that students are taught in unparallel classes, for example, experimental classes and ordinary classes. This paper aims to examine this policy effect on academic achievement. Regression discontinuity design is super suitable to the setting where students are classified according to their performance in an exam. I also tries to investigate what explains this difference (if any). Several hypothesis are examined: (i) peer-quality effect; (ii) teacher-quality effect; and (iii) self-investment effect.
2019 “Macroeconomic Announcement and Threshold Effect on Risk Premium and Stock Return”
Motivation: Over the past decade, China economy has went through a speed-down. The voice of keeping the GDP growth above some threshold can be heard everytime the economic growth has a tendency to slip into a lower rate. For example, when GDP growth in third quater of 2019 is announced to be 6.0%, the controversy is immediately aroused whether is necessary to keep growth rate above 6.0%. One argument of proponent is that 6.0% is an important threshold for expectation.

SKILLS

Coding

Experience: R, Stata, Python, LaTeX

Languages: Mandarin (native), English (intermediate)

OTHER ACTIVITIES

2019

Securites Analyst Intern

China Galaxy Securities Co.
